DETAILED ACTION

This office action is response to Remarks file on 02/27/2007.

Claims 1-17 and 19-44 are amended.

Allowable Subject Matter

1. Claims 1-44 are allow.
2. The following is an examiner's statement of reasons for allowance:

The prior art record, Vitebsky (US 7,072,661) teaches a method comprising:
forming a connection between a base station and a mobile station of a mobile communication system, requesting for allocation of information transfer capacity to the mobile station (Abstract, C4, L19-45, Fig.1, Illustrate communication between remote terminal 14 and base station 12).

However, in Vitebsky or in combination of reference are fails to fairly teach or suggest connecting the mobile station to a service site formed by a remote station of the base station, the service site being located inside the cell formed by the base station, the service site using the same radio interface as the cell, the service site providing the mobile station with higher information transfer capacity than the cell, the remote station being controlled by the base station, and the traffic of the remote station being routed via the base station; and

transferring information by using the service site as specific detail and including all limitations as particularly recited in claim 18.

Claims 2-17, 19-44 are allow as being dependent on the independent claims 1 and 18.

Accordingly, Applicant's claims are allowed for these reasons and for the reasons recited in an amendment file on 02/27/2007.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
